Better Health – Better Life

BRIDGES AFTER HOURS GP CLINICS

Bridges After Hours GP clinics provide access to GP services when your regular GP practice may be closed. Bridges enables you to access a doctor for issues that do not need a trip to the emergency department. Bridges is not a replacement service for your regular GP.

As with any new service, when you visit for the first time, you will be asked to complete a patient registration form that includes some personal and health information.

We will ask for consent to release your personal and health information to other health professionals including your regular GP.

HERE TO SERVE THE HEALTHCARE NEEDS OF OUR COMMUNITY

We can assist with:

- Sudden onset of minor illness
- Minor burns, cuts, and abrasions
- Conditions that don't require a trip to the emergency department, but can't wait until your regular GP is available

Bridges is a walk-in service and it can be difficult to estimate the volume and timing of consultations. As such, we may reach capacity earlier than expected and you may not be able to see a doctor.

OUR FEES

Standard consultation fees apply and are payable at time of consultation.

For information regarding concessions, please contact your local Bridges Clinic.

Additional charges may apply for treatments requiring suturing, removal of foreign objects, ECG, and pregnancy tests. These services are claimable through Medicare.

**NO DRUGS OF ADDICTION
WILL BE PRESCRIBED BY THIS
SERVICE AND ARE NOT KEPT
ON THE PREMISES**
